BRAND STORY

The animals are important to me throughout my life – I always loved and admired them and was passionate about dog breeding at a young age. When I was 16 my parents allowed me on the occasion of my birthday to acquire a puppy – purebred poodle. At the age of 17 I started to groom my dog and other dogs, and at the age of 18 headed the Lithuanian poodle lovers club. Being 23 years old I became an international judge.

Participating in shows in different countries presenting my pets to the world has become an integral part of my life. **In 1999 one of my biggest dreams came true – this was the date when „Tauro Kennel“ was founded**, where I have started to work with three different breeds: the Bichon Frise, Maltese and Pomeranian Spitz breed.

Our raised dogs are the winners of many world exhibitions and **have won more than 1500 champion titles throughout the entire history of the kennel.**

Invaluable **more than 30 years of experience in breeding and grooming**, allows me to understand the quality of a good tool. What material it should be made of, or what qualities it should have. During my practice I have probably tried almost all possible scissors in the world and when I decided to create scissors collection I already precisely knew what it should be.

I have started a long journey of trials to select the best producer, that could fulfill all requirements I had. It took few years to work out perfect material, shape and all collection to a smallest details.

Today I am more than happy to represent you **a unique scissor collection which is made precisely from the best materials and in a best possible quality to give you the experience of a truly professional tool.**

WHY TAURO PRO LINE SCISSORS?

We proudly introduce a unique collection of scissors which is created from more than 30 years of practice. Professional and meets the individual needs of both the pet, the cynologist and the breeder. You can find here the

products that suit you and the most effective solution. Feel the truly professional quality tools with Tauro Pro Line scissor collection created by Janita J. Plunge!

ANATOMY OF SCISSORS

1. TYPE OF BLADE TIPS

Rounded tips scissors are perfect for delicate areas such as pads, nose and around the eyes. Usually beginner groomers like to choose them for delicate grooming work to help avoid accidental injury.

Straight edge is the sharpest and is perfect for a very crisp finish with much less effort so they are perfect for finishing. This blade also allows more complex techniques, such as slicing.

2. SHARP AND STRONG BLADES

Made from 440 stainless steel which makes them stronger durable for even everyday intense use.

3. STRONG AND STABLE ADJUSTABLE SCREW

Scissors include a tension screw which allows you to tension your scissors without the help of any other tools.

4. SCISSOR LENGTH

The length of a scissor is measured from the very tip of the blade to the end of the longest finger hole. It doesn't include the finger rest.

Size		Use
Inches	Centimeters	
4.5"	11	Close work around the eyes and ears, trimming around feet and pads.
5-6"	12-15	For those who find the 4.5" scissor too small.
6.2-7.5"	16-19	The most popular size, suitable for trimming a variety of breeds.
8-10"	20-25	For working on larger breeds and for finishing.

5. RUBBER BUMPER/ SILENCER

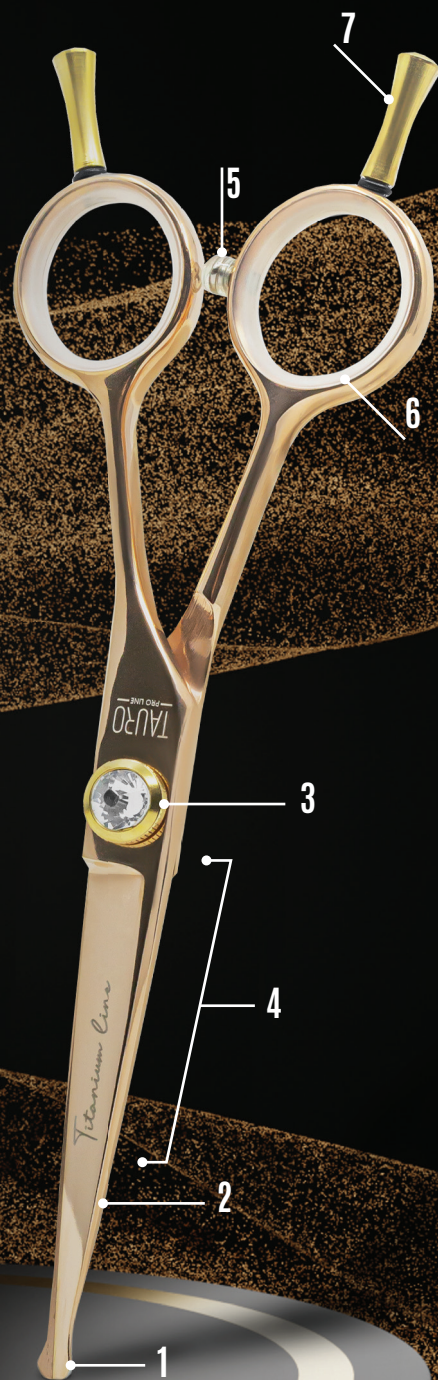

Reduces the cutting noise which makes pet calmer.

6. FINGER RINGS INSERTS FOR SOFT FINGER PROTECTION

Prevents fingers from pain and imprint usually left by casual scissors.

7. FINGER REST

Scissors have multiple/ removable or none at all finger rests to provide comfort for groomer while cutting.

JANITA J. PLUNGE LINE

Tauro Pro Line scissors are made of the highest quality single alloy stainless steel 440c, used only for the production of professional scissors. These scissors are light, so they are very easy and maneuverable, and due to the

high-quality materials used in their production, they are extremely sharp. The line is for professionals.

Janita J. Plunge

SCISSOR CARE AND MAINTENANCE TIPS

Scissors come in all shapes and sizes, and with the correct care and maintenance they should last you a long time. Especially it's important to keep them in an original case.

It holds scissors in place, easily take in or take out. This elegant case gives comfortable touch while highlighting your mastery.

SCISSORS WILL LAST LONGER WHEN YOU:

- ✓ Clean your scissors with a soft cloth between every groom! If the blades are covered in dirt, moisture, hair and chemical's it can lead to corrosion, nicks or blade damage.
- ✓ Regularly oil your scissors. Open the scissors and apply a small amount of oil above and below the adjustment screw on both sides.
- ✓ Get your scissors professionally sharpened periodically, normally between 3-6 months or as required (excluding accidental damage).
- ✓ Check the tension of your scissors throughout the day and adjust them accordingly.
- ✓ Do not drop or toss the scissors in a draw for storage. Always keep them in a case, carrier or pouch whenever possible to prevent damage.

✓ **THE MOST IMPORTANT TIP IS TO HOLD SCISSORS IN ITS ORIGINAL CASE**
